Re: Northwest Door, Inc.
Tacoma, WA

Dear Joe:

Foushée and Associates would like to thank you and your company for your fine work completing the storm repairs at the Northwest Door, Inc. project. A rare September tornado hit the existing manufacturing facility at 7:00 a.m. on a Monday morning, as record amounts of rain fell. The storm tore a 40-by-40 foot hole in the roof and damaged various areas throughout the entire roofing area at Northwest Door. 100 workers were evacuated. Foushée contacted Wayne's Roofing, based upon our longstanding relationship and confidence in the company's capable expertise to get the job done. Our client, Northwest Door, was impressed and appreciative of Wayne's Roofing's ability to provide emergency roofing almost immediately, minimizing downtime for the business. When the time came for the required replacement of the 291,300 square feet of the insulated roofing assembly, Wayne's Roofing not only completed the work safely, on time and to the specifications, but also provided several cost saving options that provided the owner and insurance company with confidence that we were doing the right repairs. Foushée would not hesitate to call on Wayne's again in an emergency, or at any other time. We look forward to working with you again soon.

Sincerely,

Robert Guymer
COO
